WORK EXPERIENCE

Frontend / UX Engineer Mrkdwn, Inc.

01/2018 – Present

Tasks

- Designed adaptive layouts for consistent user experience across the product.
- Delivered high-quality design docs: sketches, user flows, wireframes, mockups, specifications using Sketch and Zeplin.
- Developed front-end applications using HTML, CSS, Sass, React and Redux.
- Integrated Frontend application with REST API.

Project Manager Seer Technologies Inc.

02/2013 – 12/2017

Tasks

- Responsible for the definition of project scope and objectives, involving all relevant stakeholders, and ensuring technical feasibility.
- Developed full-scale project plans and associated communications documents, project timelines, and milestones using appropriate tools.
- Coordinated internal resources and third parties/vendors for the flawless execution of projects.
- Successfully managed project stakeholders
- Led development of sales proposals, project plans and RFP responses.
- Prospected and negotiated terms of contract with new clients.
- Managed changes in project scope, identify potential crises, devise contingency plans and functioned as an escalation point.
- Did a QA testing to ensure projects were implemented according to specification and have minimal bugs
- Involved in user interviews and usability testing.
